Project Title:

virtual agent-driven SLA breach awareness and justification system

Adding Reports to an Existing Dashboard

Step 1: Open the Dashboard

- Navigate to **Self-Service → Dashboards** (or **Dashboards** in the Filter Navigator).
- Open the existing dashboard where the reports need to be added.

Step 2: Enter Edit Mode

- Click the **Edit** button to modify the dashboard layout and contents.

Step 3: Add Dashboard Content

- Click **Add Content** to open the list of available dashboard widgets and reports.

Step 4: Select the Required Reports

- Browse or search for the required reports, such as **SLA Breach Report**, **Incident Summary Report**, **SLA Compliance Report**, or **Justification Report**.
- Select the reports that need to be displayed on the dashboard.

Step 5: Add Reports to the Dashboard

- Click **Add** to insert the selected reports into the existing dashboard.
- The reports are displayed as charts, graphs, lists, or scorecards based on their configuration.

Step 6: Arrange the Dashboard Layout

- Drag and drop the report widgets to organize them in the desired layout.
- Resize the widgets to improve visibility and readability. **Step 7: Save the Dashboard**

- Click **Save** to apply the changes and update the dashboard with the newly added reports.

Step 8: Verify Dashboard Functionality

- Refresh the dashboard and verify that all reports display accurate and real-time data.
- Ensure that users with appropriate permissions can view the updated dashboard.

Benefits

- Provides a centralized view of multiple SLA reports.
- Improves real-time monitoring of incidents and SLA performance.
- Enhances data visualization through charts and graphs.
- Supports faster decision-making.
- Reduces the need to open individual reports separately.
- Increases productivity and operational efficiency.
